Contents

1	Transforms	3
1.1	Fourier Transforms	3
1.1.1	Continuous-Time Fourier Transform	3
1.1.2	Continuous-Time Fourier Series	3
1.1.3	Table A.1: Continuous-Time Fourier Transform Properties	3
1.1.4	Table A.2: Continuous-Time Fourier Transform Pairs	4
1.2	Discrete-Time Fourier Transform	4
1.3	Discrete Fourier Transform	4
1.4	Z-Transform	5
2	Matrix Algebra	5
2.1	Column Space, Row Space, Null Spaces	5
2.1.1	Example B.1	6
2.1.2	Example B.2	6
3	Special Matrices	6
3.1	Hermitian Matrices	6
3.2	Unitary Matrices	7
3.3	Fourier Matrices	7
3.4	Toeplitz and Circulant Matrices	7
4	Matrix Decompositions	8
4.1	Eigenvalue Decomposition	8
4.2	Singular-Value Decomposition (SVD)	9
4.3	QR Decomposition	9
4.4	Trace and Determinant	10
4.5	Frobenius Norm	10
4.6	Moore–Penrose Pseudoinverse	11
4.7	Matrix Inversion Lemma	11
4.8	Kronecker Product	11
5	Random Variables and Processes	12
5.1	Random Variables	12
5.1.1	Bayes’ Theorem	12
5.2	Expectation	12
5.3	Correlation	13
5.4	Properness	14
5.5	Circular Symmetry	14
5.6	Unitary Invariance	14
5.7	Linear Transformations	14
5.8	Kurtosis	15
